**IRRIGATION AND CAD (Projects-IV) DEPARTMENT**

**G.O.Rt.No. 443**

**Dated: 20-04-2017**

**Read:-**

Recommendations of the Group of Ministers, vide minutes of meeting held on 17.03.2017.

&&&&

**ORDER:-**

SRSP project constructed during 1964-69 has been designed to irrigate 9.68 lakh acres in Stage-I and subsequently, 5.00 lakh acres under Stage-II. Meanwhile due to siltation in the past 20 years, the capacity of the Dam has reduced to 90 TMC from the initial 112 TMC. This has reduced the utilisation of water even in the years of good flows. Due to large scale construction of Barrages, Check Dams etc., in the upstream Maharashtra State and due to variations in Rainfall, the dependable flows observed in last 20 years is only 54 TMC as against the earlier estimated yield of 149 TMC. While on the one hand the dependable inflows have come down considerably, on the other hand many new schemes (Ali sagar Guthpa, Lift Schemes of BRAPCC in Nizamabad & Adilabad and IDC) had been taken up in the fore shore of SRSP.

2. After reviewing the above status and taking into consideration of the recommendations of the Group of Ministers in the reference read above Government hereby accord in principle approval for the proposal of lifting 1.00 TMC of water per day for 60 days to SRSP reservoir from the Flood Flow Canal System duly strengthening the existing Flood Flow Canal with lining in banking and vulnerable reaches

3. The Engineer-in-Chief (Irrigation), Hyderabad, shall take necessary action for submitting the detailed proposals for accordingly Administrative approval.

**(BY ORDER AND IN THE NAME OF THE GOVERNOR OF TELANGANA)**
